Whether you work at a law firm or in a corporate legal department, Dragon Legal is the ideal solution for reducing transcription costs and reliance on support staff while dramatically speeding document turnaround for improved client service.

Designed specifically for legal users, Dragon Legal provides powerful capabilities that drive productivity gains and cost savings:

- Special language model that delivers optimal recognition accuracy for dictation of legal documents
- Automatic formatting of legal citations
- Importing and sharing of custom word lists
- Auto Transcribe Folder Agent and Roaming User features that streamline third-party review and correction
- Remote dictation using a digital voice recorder or a compatible iOS device for automatic transcription upon connection to a PC .

In addition, Dragon Legal's enterprise-ready security features, configuration options and administrative tools make it easy to manage large user networks.

IGNITE PERSONAL PRODUCTIVITY WITH FAST, ACCURATE DICTATION

Dragon Legal is designed specifically for the legal industry. It features a special language model—trained using more than 400 million words from legal documents—that helps you achieve optimal recognition accuracy when dictating legal terms. You can import custom word lists that reflect your client base and areas of specialty and share them across the enterprise. Automatically format legal citations. And use Dragon's third-party correction features to streamline your transcription workflow for fast document turnaround.

IGNITE PRODUCTIVITY WITH FAST, ACCURATE DICTATION

Dictate naturally to create documents, spreadsheets, presentations, email, and more—three times faster than typing—with up to 99% accuracy. With Dragon Legal, you'll even get more accurate dictation results over time. Intelligent reminders prompt you to initiate analysis of documents and emails so Dragon quickly adapts to your voice and writing style. Plus, the software automatically updates your voice profile based on your dictation sessions and corrections to deliver continuous accuracy improvements.
