

# eCopy ShareScan v5.2 Family Comparison.

Scanning and workflow platform with bundles to meet the requirements of any sized business.

eCopy® frees information trapped in documents and accelerates business workflows by transforming static scanned documents and images into searchable and actionable digital information integrated directly into an organization’s business systems. The modular eCopy ShareScan product portfolio gives customers the freedom to tailor a solution by selecting the ShareScan workflow components a la carte or from an array of packaged solutions – all of which can be mixed and managed as one system.

### NEW eCopy ShareScan

**Enterprise:** This new package gives customers access to all “Optional” eCopy Connectors and Extenders at a very compelling price. Enterprise is an easy to order and deploy bundle designed to meet any sized customer’s document processing needs for years to come.

	<b>Enterprise</b> High scalability & high automation document capture workflow platform. Includes all Nuance eCopy Connectors and Extenders in a single, low cost license for deployments with 50 or more MFPs.				–
